

# eMAX URBAN INTERFACE

## TAKE EMERGENCY RESPONSE TO THE MAX, THE eMAX.

One of the industry's most innovative apparatus designs, the eMAX, now meets the unique, diverse demands of Urban Interface. The Urban Interface eMAX offers maximum maneuverability with a short 168" wheelbase and maximum storage space for a configuration of this size with up to 340 cu. ft. of storage. It also features maximum accessibility with low, pre-connected handlines and a rear access ladder.

# MAXIMUM PERFORMANCE.

The eMAX Urban Interface is equipped with a 20 degree angle of approach and departure for off-road clearance, front skid plates and fuel tank brush guard for off-road protection, low profile bumper turret with joystick controls, and an optional hydraulic pump and roll system. All these features combined allow your department to maximize its performance with the Urban Interface eMAX by E-ONE.

## → MAXIMUM MANEUVERABILITY

Our eMAX pump location and apparatus configuration is designed to offer maximum maneuverability with a 168" wheelbase and maximum storage space for a configuration this size.

## → MAXIMUM STORAGE SPACE

The eMAX Custom Pumper offers maximum storage space with up to 340 cubic feet of storage.

## → MAXIMUM ACCESSIBILITY

The eMAX Custom Pumper offers maximum accessibility with pre-connected handlines and a rear access ladder.
