COMMAND CENTER

SPECIFICATIONS

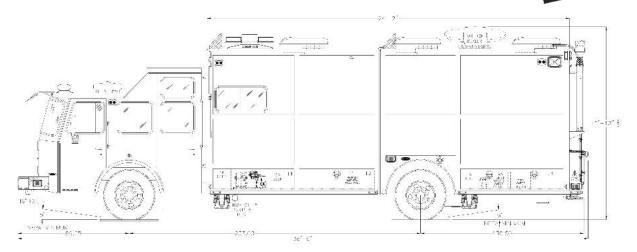

VERSATILE. DURABLE.

The E-ONE command center can be configured to meet many mission critical needs for both fire, law enforcement/ homeland security. Bodies are built primarily in extruded aluminum with available leveling systems and slide out rooms. Command, communications and drone flight control are just a few tasks that a command center can tackle with ease. Custom configured to offer a wide array of custom communications and technology to aid in quickly mitigating and documenting the response to increase response effectiveness. The command center is the unit you never want to have to use but it is the most valuable piece of equipment when a serious crisis develops in your community.

E-ONE engineers extruded aluminum products that meet or exceed NFPA standards and are built to last in the harsh environments where they serve. All E-ONE bodies are fully modular in design and construction, meaning the entire body can be lifted away from the frame without body failure. This construction is the most durable and ensures the longest service life in the industry.

CHASSIS

- Industry leading Cyclone® or Typhoon® chassis with short, medium, long and extended length 2 or 4-door cabs
- Galvanized/ powder coated 10.25"-12" Cchannel frame and liner if applicable
- Up to 600 HP Engine on custom
- Standard safety features such as roll cage cab, CrewGuard & ABS brakes
- Optional safety features such as airbags & G4 (electronic stability control)
- Also available on select commercial platforms optioned as available from OEM

BODY

- Body available in extruded aluminum
- Body sizes ranging from 16' to 26'
- Exterior access to storage compartments
- · Roll up or hinged doors
- Under body compartments
- Awning: electric or manual

INTERIOR

- Office environment with work stations and/or conference rooms
- Optional galley or head available

ELECTRICAL

- Multiplex electrical system with color display provides increased feature capability and improved diagnostics
- Light tower on top of cab or body
- Whelen® optical and audible warning packages standard, others optional
- Fully customizable electronics solutions built to customer's needs
- From rack ready to fully rigged
- Remote access

RESCUE PACKAGES

- Generators: 5kW to 75kW, direct drive, hydraulic, diesel
- Elevated lift mast or camera towers with recording capabilities

TECHNOLOGY

- Technology solutions for communications, satellite up-link, or drone flight command
- · Slide out rooms
- · Leveling systems
