

ECOLOGIC[®] FOAM TEST SYSTEM

ENVIRONMENTALLY RESPONSIBLE TESTING.

The ECOLOGIC[®] mobile test system is an input-based testing system designed to provide fire departments the means to test the accuracy of their foam system without the expense or environmental impact of using foam to perform an output-based test. A single cart can be used to test multiple trucks and is an excellent system for retrofitting vehicles currently in your fleet.

E-ONE.COM

TESTED. PROVEN.

The ECOLOGIC® test system give you the option for either Mobile Cart or Vehicle Installed options. The Mobile Cart option can be used to test multiple trucks and is an excellent system for retrofitting vehicles currently in your fleet. The Vehicle Installed option is capable of testing various foam systems and is intergral to vehicles plumbing system.
