

HP 75 LADDER

EXCEED EXPECTATIONS.

E-ONE's HP75 features an extruded aluminum ladder that exceeds NFPA requirements with a 2.5:1 structural safety factor. In addition, the aluminum aerial will not rust, need painting, or require rung cover replacement. The HP75 delivers lower life-cycle cost than other aerials on the market.

TRIED & TRUE

The HP75 is available with a Typhoon or Cyclone chassis that has galvanized and powder coated frame rails for long life. Our cabs are engineered with an extruded aluminum roll-cage design providing added protection for your crew. With the combination of generous compartmentation, ground ladder storage, hosebed and tank size, the HP75 out performs, out maneuvers and provides greater value than the competition.

→ WIDE FLY SECTION

Fully welded extruded aluminum ladder with integral non-slip rungs and tall handrails provide a safe and secure climbing environment and low cost of ownership.

The SideStacker bodies feature full depth/ full height compartments maximizing storage space. A wide array of shelves, trays and tool boards are available to meet department's needs. With over 170 cu. ft. of available compartment space, the HP75 offers an excellent utilization of space.

With multiple hose beds available, E-ONE can meet your department's needs for hoseload requirements. From SideStacker hose beds to center hose bed configurations, we can meet anything from a single lay up to 1200' of 5" supply.

VERTICAL REACH	75'
HORIZONTAL REACH	70' 2"
TIP LOAD	500 lb. tip load wet or dry
WATERWAY	Waterway flows up to 1500 GPM
OUTRIGGERS	Single set of outriggers at 16' with optional short jack and alley mode
CAB	Typhoon or Cyclone cabs from 58" to 74"
CHASSIS	Powder coated hot dipped galvanized frame rails with a 210"-230" wheelbase
AERIAL CONTROLS	Manual, AACS Basic and AACS Deluxe
ENGINE	Cummins engine up to 605 HP
BODY CONFIGURATION	Extruded aluminum Quint body with Sidestacker or center hosebed configuration
GROUND LADDERS	Over 100' exceeding NFPA requirements
PUMP	Hale, Waterous, Darley of MAC1 pumps up to 2,000 GPM
